

## Curriculum Vitae

### Gilles TRAN

Engineer  
Project Manager, Association Française  
de Zootechnie

Gilles Tran joined AFZ in 1989, after completing his engineering studies at AgroParisTech as a specialist in Animal Productions. Since then, he has been AFZ's primary project manager, and has been directly in charge of the creation and daily operation of the French Feed Database, a national feed information system.

He has participated in numerous public and private projects concerning feed research and feed information systems.

In 2002-2004, he co-ordinated of the INRA / AFZ Tables of composition and nutritional values of feed ingredients and he has been developing the new version of these tables to be published in 2017 as an open access website.

He is in charge of the Feedipedia project, an on-line encyclopedia of animal feed resources developed by INRA, CIRAD, AFZ and FAO, and he is the leader of the Work Package "communication and dissemination" of the Feed-a-Gene H2020 project (2015-2020).
